---

Richard Wright's debut solo album, 'Wet Dream', is to be reissued on vinyl for the first time since its original release in 1978 this time in deep blue transparent marbled. It will also be available on CD and on blu-ray which includes a 5.1 mix and never before released personal images and videos from around this period of his life.

Remixed by Steven Wilson, this reissue comes with brand new artwork that was commissioned and art-directed by Gala and Jamie Wright, Richard's children and managers of his estate. As per the original release, the bi-fold sleeve folds out to extend the image and features the same vibrant colour palette. This time, the unidentified person in bright red shorts is swimming within deep blue waters of the sea rather than a pool and the image expands out to reveal a boat slightly out of their reach, referencing the nautical theme of the record.

*In uscita il 28 luglio il cd, il 29 settembre il vinile acquistabili su [sumup](#)*
