Brand new album from punk pioneers Buzzcocks. • It's punk rock with a Motown vibe! A new album should always have elements of surprise and create its own world, and this does! • It avoids the cliché and expands the Buzzcocks' magical journey! Legendary Manchester punk outfit BUZZCOCKS need little introduction. Back in 1977, they gave birth to a generation of independent labels with their debut EP 'Spiral Scratch'. Thereafter, their melodic punk-pop proved irresistible, leading to hit singles and three landmark albums. They broke up in 1981 but reunited in 1989 and have been going steady ever since. Sadly, singer Pete Shelley passed away in 2018 but founder member and the band's other singer/ songwriter Steve Diggle has kept the flag flying. 2026 sees them release their 12th studio album 'Attitude Adjustment' which is bursting with 14 brand new tracks that will delight fans of the iconic and much loved Manchester music institution.
